

AmendmentAMENDMENTS TO THE SPECIFICATION

Please rewrite the first full paragraph on Page 35, lines 13-15, as follows:

E1  
Embodiment 1 of the color correction circuit of the image processing apparatus will be described in detail by reference to the drawings.

Please rewrite the heading for Embodiment 2, Page 41, line 9, as follows:

E2  
(Embodiment 2 of the color correction circuit)

Please rewrite the heading for Embodiment 3, Page 45, line 14, as follows:

E3  
(Embodiment 3 of the color correction circuit)

Please rewrite the last paragraph on Page 45, lines 17-25, as follows:

E4  
Numeral 241' designates an operational amplifier with a disabling function, which is a circuit wherein the output of the operational amplifier 241' goes into a high-impedance state when disabled. Since the operational amplifier 241' is considered to be a combination of the operational amplifier 241 with the switch 202 in Embodiment 2 of the color correction circuit of Fig. 54, the operation of the circuit in this Embodiment 3 of the color correction circuit is equivalent to the operation of the circuit in Embodiment 2 of the color correction circuit.
